<p>IRON MOUNTAIN GOVERNMENT SERVICES INC http://www.ironmountain.com/solutions/gov/</p>	<p>The information management and data protection needs of government are complex, time-sensitive, and growing. With procedures and processes that generate vast quantities of information, governments are facing increasing pressure to implement cost-effective strategies that reduce the risks involved in protecting, managing, and providing timely access to that information.</p> <p>Iron Mountain Government Services Inc. (IMGS) is a wholly owned subsidiary of Iron Mountain that delivers comprehensive services to government customers by partnering with them to manage, store, access, and protect vital information as well as physical assets. IMGS is a trusted advisor to public sector customers in municipal, state, local, federal, and international governments worldwide.</p>	<p>Helping governments achieve high performance</p> <p>Iron Mountain’s government consulting group is dedicated to helping public sector organizations worldwide achieve high performance in the face of complex challenges. Through innovative consulting solutions and services we enable governments to deliver increased and improved services while containing costs – driving value for citizens. We can work with government agencies to conduct feasibility studies, design, implement, and manage solutions, and provide auditing capabilities.</p> <p>Rather than imposing a one-size-fits-all solution, we help you evaluate your current information management environment and related costs, assess your needs, and develop a tailored solution that supports your agency and/or government goals, complementing your existing strengths and resources. To discuss your unique service requirements, send an email to government@ironmountain.com.</p>
